Profile

Computer Science graduate with hands-on experience across full-stack development, machine learning, infrastructure, IT support, and customer-facing roles. Built a property-booking platform and a leakage-aware machine-learning pipeline using 63,010 player-map records. Seeking software engineering, full-stack, backend, and data/ML roles where I can contribute practical problem-solving, critical thinking, and clear communication. Immediately available.

Technical Skills

Languages: TypeScript, Python, SQL, JavaScript, HTML/CSS
Frameworks and Libraries: React, Next.js, Astro, Node.js, Flask, pandas, NumPy, scikit-learn
Data, Tools and Integrations: Prisma, MongoDB, Git, GitHub, Docker, OAuth, Resend, iCal/ICS, Cloudinary

Education

University of Reading Reading, UK
BSc Computer Science Sept. 2023 – Jul. 2026
• Selected final module marks: Programming in C/C++ (87%), Artificial Intelligence and Machine Learning (83%), Data Structures and Algorithms (75%), and Programming in Python (70%).

Sir William Borlase's Grammar School Marlow, UK
A Levels: Computer Science, Mathematics, Further Mathematics and Physics Sept. 2014 – Jun. 2021

Experience

Rusutsu Resort International Ski School Rusutsu, Hokkaido, Japan
Certified Ski Instructor Nov. 2022 – Apr. 2023
• Delivered tailored lessons to international groups and to adults and children, adapting plans to different abilities, goals, and learning styles.
• Explained technical movements clearly and maintained guest safety and satisfaction in a fast-paced environment, earning referrals and requests by name from returning guests.
• Earned additional ski-instruction qualifications during the season, including NZSIA Children's Level 1.

Quadrant Systems Stokenchurch, UK
Support Analyst Jul. 2022 – Sept. 2022
• Provided first-line remote support for proprietary point-of-sale systems used by hospitality clients, including The Ritz London.
• Diagnosed networking, software, configuration, and printer-connectivity issues; managed tickets, prioritised urgent incidents, and escalated them when required.
• Configured till layouts and connected devices to each client's operational requirements, documenting a recurring printer issue and making repeat support more efficient.

Selected Projects

Counter-Strike Player Performance Prediction | *Python, pandas, scikit-learn* 2025 – 2026

- Built a reproducible machine-learning pipeline spanning collection, cleaning, leakage-aware feature engineering, training, and evaluation across 63,010 player-map records from 1,795 players.
- Engineered historical player, team, opponent, workload, and map-specific features with chronological splitting and shifted histories to prevent data leakage.
- Compared classification and regression models; the selected ensemble reached 0.630 test ROC-AUC, with methodology, results, and limitations documented in the final technical report.

Maidenhead Central | *TypeScript, Next.js, React, Prisma, MongoDB* 2024 – Present

- Independently developed a property-booking platform designed to support direct bookings and reduce reliance on third-party platforms.
- Implemented credential and OAuth authentication, guest and host dashboards, listing-management tools, booking requests, and conflict-aware reservation workflows.
- Automated Resend notifications and scheduled inbound iCal synchronisation; integrated Prisma, MongoDB, and Cloudinary and deployed the development build to Vercel.

Niko's Nook | *Owner and Technical Administrator* Nov. 2025 – Present

- Own and operate infrastructure for a global Minecraft community of 200+ members, typically supporting 5–20 concurrent players alongside nine volunteer moderators.
- Manage hosting, DNS, permissions, logs, security, plugin integrations, performance, and capacity planning; maintain hourly offsite backups and successfully restored the service after a hosting fault.

QR Code Generator | *Python, Flask, Pillow* 2025

- Collaborated in a three-person coursework team to implement Version 1 and 2 QR encoding, Reed-Solomon error correction, matrix construction, all eight mask patterns, and format information from the specification.
- Integrated the shared pipeline into a Flask interface with custom colours, module shapes, output sizing, construction-stage previews, and boundary validation.

Volunteering

Maidenhead for Ukraine Maidenhead, UK and Ukraine

Volunteer Driver and Logistics Support

Feb. 2022 – Present

- Drove essential aid from England across Europe into Ukraine for onward distribution and continue supporting UK loading and logistics when available.

Additional Information

Available immediately and able to commute to London, Reading, and nearby locations by train or car. Elementary German; NZSIA Level 1 Ski Instructor; NZSIA Children's Level 1; SAJ Grade 2; AST Level 1.
